JOSUÉ TUEROS

Backend Engineer | C# / .NET | Microservices | Event-Driven | Kubernetes

Lima, Peru (open to remote) · +51 922 623 779 · jks0101@hotmail.com · linkedin.com/in/josue-tueros · github.com/Jackss0

SUMMARY

Backend Engineer with 6+ years building and operating .NET microservices in production. Experienced in event-driven architectures (Azure Service Bus, Redis), zero-downtime releases on Kubernetes (Helm, Octopus Deploy) and production troubleshooting with Splunk. Used to working directly with clients to turn business requirements into maintainable, well-tested systems. Currently preparing the AWS Solutions Architect – Associate certification.

TECHNICAL SKILLS

Backend: C#, .NET 8/10, ASP.NET Core, Entity Framework Core, REST APIs, Node.js, TypeScript
Architecture: Microservices, Event-Driven Architecture, Clean Architecture, SOLID, DDD
Messaging & Real-time: Azure Service Bus, Redis, Socket.IO
Databases: SQL Server, PostgreSQL, SQLite
DevOps & Cloud: Docker, Kubernetes, Helm, Octopus Deploy, CI/CD, AWS, Azure
Observability: Splunk, structured logging (Serilog), root cause analysis
Testing: xUnit, Moq, Playwright
Frontend & Tools: React, JavaScript, Git, AI-assisted development (Cursor, Claude)

EXPERIENCE

Backend Developer (.NET) – Jalasoft 2024 – 2026

- Designed and built custom .NET backend applications and libraries (DLLs) from complex client requirements, from analysis to release.
- Led requirement and follow-up meetings directly with clients, translating business needs into technical designs and estimates.
- Contributed to microservices design and handled on-premise deployments, taking part in testing and release cycles.
- Implemented multi-level logging that made production issues faster to trace and debug.
- Built reusable project templates to standardize service setup and development practices.
- Delivered internal knowledge-sharing sessions (STK) and technical classes for the company's training program, and contributed course materials.
- Integrated AI-assisted development (Cursor, Claude) into daily work to speed up delivery while keeping code quality.

Backend Developer (.NET & TypeScript) – Jalasoft 2023 – 2024

- Built backend services and automation processes in .NET and TypeScript.
- Improved team workflows and technical documentation.
- Fixed production bugs, improved issue-tracking processes and took part in sprint planning and estimation.

Backend Developer (.NET) – Tranzact 2019 – 2022

- Owned deployment processes and bi-weekly production releases with zero downtime using Docker, Kubernetes, Helm and Octopus Deploy.
- Developed and maintained .NET Core microservices exposing REST APIs and communicating through event-driven messaging.
- Investigated and resolved production incidents with Splunk and SQL Server, performing root cause analysis and delivering long-term fixes.
- Monitored and validated production after every release to ensure reliability and performance.

PROJECTS

PokeLances – Real-time TCG marketplace pokelances.com
Node.js, React, PostgreSQL, Redis, Socket.IO, Cloudflare

- Built and run in production a real-time marketplace with live and scheduled auctions, offers and counteroffers, push notifications and local payment methods.
- Designed batch pipelines that ingest daily TCG product data (TCGCSV) to power price history, snapshot-based market prices and trend charts.
- Built a financial dashboard for stores (expenses, profit and loss, key metrics) integrated with marketplace transactions.
- Reduced latency across regions by routing traffic through Cloudflare's proxy; used Redis for caching and real-time data.

StockWatch PE – Retail stock monitor

C#, .NET 10, EF Core, Serilog, xUnit, Playwright, Docker

- Built a .NET 10 worker service that monitors Peruvian online retailers across 5 e-commerce platforms (VTEX, Shopify, Magento GraphQL, Next.js, sitemaps).
- Pluggable store-adapter architecture with resilient HTTP clients, EF Core persistence, structured logging and unit tests.
- Sends real-time Discord alerts (price, language, seller, image) and prepares a human-confirmed checkout with Playwright.

CERTIFICATIONS

AWS Certified Solutions Architect – Associate (SAA-C03) In progress

EDUCATION

Technical Degree in Computing and Information Technology – CIBERTEC, Lima, Peru 2016 – 2019

LANGUAGES

Spanish – Native | English – B2 (Upper-Intermediate)
